PROFESSIONAL SUMMARY

Passionate AI & Data Science undergraduate with expertise in Software Engineering, Machine Learning, Generative AI, and Full-Stack Development. Experienced in building AI-powered applications, RAG systems, agentic workflows, backend APIs, and scalable web applications using Python, FastAPI, LangChain, SQLAlchemy, and the MERN stack. Strong foundation in problem-solving, modern software engineering practices, and delivering end-to-end AI solutions.

TECHNICAL SKILLS

Programming Languages: Python, Java, Typescript, Javascript

Software Engineering: FastAPI, REST APIs, SQLAlchemy, OOP, Data Structures & Algorithms

Frameworks Libraries: React, Next.js, Node.js, Express, Tailwind CSS

Generative AI: LangChain, LangGraph, RAG, Prompt Engineering, Multi-Agent Systems, Ollama

Machine Learning: Classification, Regression, NLP, Feature Engineering, Model Evaluation

DevOps: Basic DevOps, Docker, Linux, CI/CD

Libraries: Pandas, NumPy, Scikit-Learn, Hugging Face

Databases: PostgreSQL, MySQL, ChromaDB

Tools: Git, GitHub, Linux, VS Code, Jupyter Notebook

EXPERIENCE

Software Developer Intern — Cyber Sakshar Nashik

May 2023

- Contributed to 3 live client projects, implementing responsive front-end interfaces and dynamic back-end APIs to enhance performance and usability
- Collaborated with a team of developers and designers to integrate RESTful APIs, improving feature scalability and reducing load time by 30
- Built and deployed interactive web modules using React.js and Tailwind CSS, ensuring mobile-friendly and cross-browser compatible design.

PROJECT EXPERIENCE

INSIGHTCOACH AI – Turn Data into Understanding with AI

[GitHub](#)

Python, FastAPI, LangChain, Groq, React, Pandas

- Developed InsightCoach AI, a full-stack AI-powered learning platform that converts raw CSV datasets into interactive educational experiences through automated data analysis and AI-assisted guidance.
- Engineered AI workflows for dataset profiling, natural language explanations, machine learning recommendations, visualization suggestions, and context-aware mentor conversations using LangChain and Groq LLMs.
- Designed a scalable FastAPI backend with RESTful APIs for file processing, conversational AI, and dataset analysis, integrated with a modern React frontend to deliver an intuitive, responsive user experience.

CODEMENTOR AI – AI-Powered Codebase Assistant

[GitHub](#)

Python, LangChain, Groq, React, ChromaDB, GitPython, FastAPI

- Developed CodeMentor AI, an AI-powered code understanding assistant that enables developers to analyze ZIP projects or public GitHub repositories through natural language conversations using RAG.
- Built an intelligent code analysis pipeline with LangChain, HuggingFace Embeddings, and ChromaDB to perform semantic code indexing, vector search, context retrieval, and AI-powered explanations of source code.

RESEARCHFLOW AI - Multi-Agent AI Research Assistant

[GitHub](#)

LangGraph, LangChain, ChromaDB, Groq, Hugging Face, React

- Developed ResearchFlow AI, a full-stack AI-powered research assistant that automates end-to-end research through a multi-agent workflow using LangGraph and RAG.
- Designed specialized AI agents for research planning, live web search, PDF analysis, semantic retrieval, report generation, and AI-driven critique, enabling accurate, context-aware research reports from multiple knowledge sources.
- Designed a responsive and intuitive React interface with Tailwind CSS, providing real-time visualization of multi-agent workflows, research progress, and AI-generated reports through Server-Sent Events (SSE).

CAREERPILOT AI – AI-Powered Resume & Career Coach

[GitHub](#)

Python, LangChain, LangGraph, RAG, ChromaDB, Hugging Face, React, FastAPI

- Developed CareerPilot AI, a full-stack AI-powered resume and career assistant that delivers personalized career guidance through a Retrieval-Augmented Generation pipeline and LangGraph multi-agent workflow.
- Designed specialized AI agents for resume analysis, career guidance, and interview preparation, enabling context-aware responses grounded in uploaded resume content using semantic retrieval with ChromaDB and HuggingFace Embeddings.

EDUCATION

Bachelor of Engineering in Electronics & Telecommunication

Expected May 2027

Bharati Vidyapeeth's College of Engineering, Pune

SGPA: 7.76 / 10

ACHIEVEMENTS & CERTIFICATIONS

- **Published Paper – “Theory Exam Seat Management System” (IEEE, Mar 2023)** Proposed a digital platform to automate exam seat allocation using algorithmic mapping, reducing manual scheduling errors and improving efficiency.
